

# THE ROLE OF A SLEEPING MAT

IT IS IMPORTANT NOT TO UNDERESTIMATE THE ROLE OF AN EXCELLENT SLEEPING MAT IN CREATING THE RIGHT CIRCUMSTANCES FOR SLEEP. A GOOD MAT WILL PROVIDE COMFORT, AND INSULATION. THE SLEEPING MAT AND THE SLEEPING BAG WORK TOGETHER TO CREATE THE BEST SLEEPING EXPERIENCE.

## LIGHTWEIGHT & COMFORTABLE

We have focused on creating a range of mats which is both light, comfortable and provide good insulation.

### FOAM SLEEPING MATS:

We build foam mats because they provide superior insulation and can be provided with a range of finishes which create a great first touch feeling.

### OUR FOAM MATS COME IN THREE VARIETIES:

#### Vertically and Horizontally perforated foam

A foam mat with holes drilled horizontally throughout. There are also vertical holes drilled into the foam in the head and legs area. With approach a Warmth-zone is created around the torso insuring that when someone lies down the foam supports the bodyweight. Our lightest mat. (Find it on the LITE series.)

#### Horizontally perforated foam

A foam mat with horizontal holes drilled out of the foam throughout. This approach reduces weight without compromising on insulating value. (Find it on the Ultimate and Dreamzone.)

#### Air Sleeping mats

This season, as a response to the growing demand for super lightweight and compact camping solutions we introduce the AirTec and AirTec Comfort. The **AirTec** is our lightest mat built with a stripped back approach prioritising weight and compact packing. The AirTec Comfort is marginally heavier featuring The AirTec a 3D Polarshield® filling over the whole mat and extra heat zones placed strategically around the hip and torso areas.
